

DOMAIN: INFRASTRUCTURE

TECHNOLOGY SERVICES:

AUTOMATION AND ORCHESTRATION > MULTI DOMAIN AND MULTI VENDOR ZERO X NETWORKS

CLIENT:

Innovative EDGE Network Vendor

CHALLENGE:

Easy to use and lightweight orchestration solution with Zero-X (Wait, Touch, Trouble) and Self-X (Serving, fulling, assurance) automation for edge compute platform.

SOLUTION:

Delivered end to end scalable automation and orchestration solution that includes hardware with QAT/GPU acceleration for POD/AI workloads, VIM, VNFM and applications.

OUTCOME:

Accelerated the go-to-market of industry-first AI-enabled OS for edge computing with a high-performing autonomous edge computing platform solution
