

DOMAIN: COMMUNICATIONS

TECHNOLOGY SERVICES:

TEST AS A SERVICE -> CONVERGED CORE NETWORK

CLIENT:

North American University

CHALLENGE:

Resolving interoperability issues with 4G, 5G NSA and SA Converged Core Network

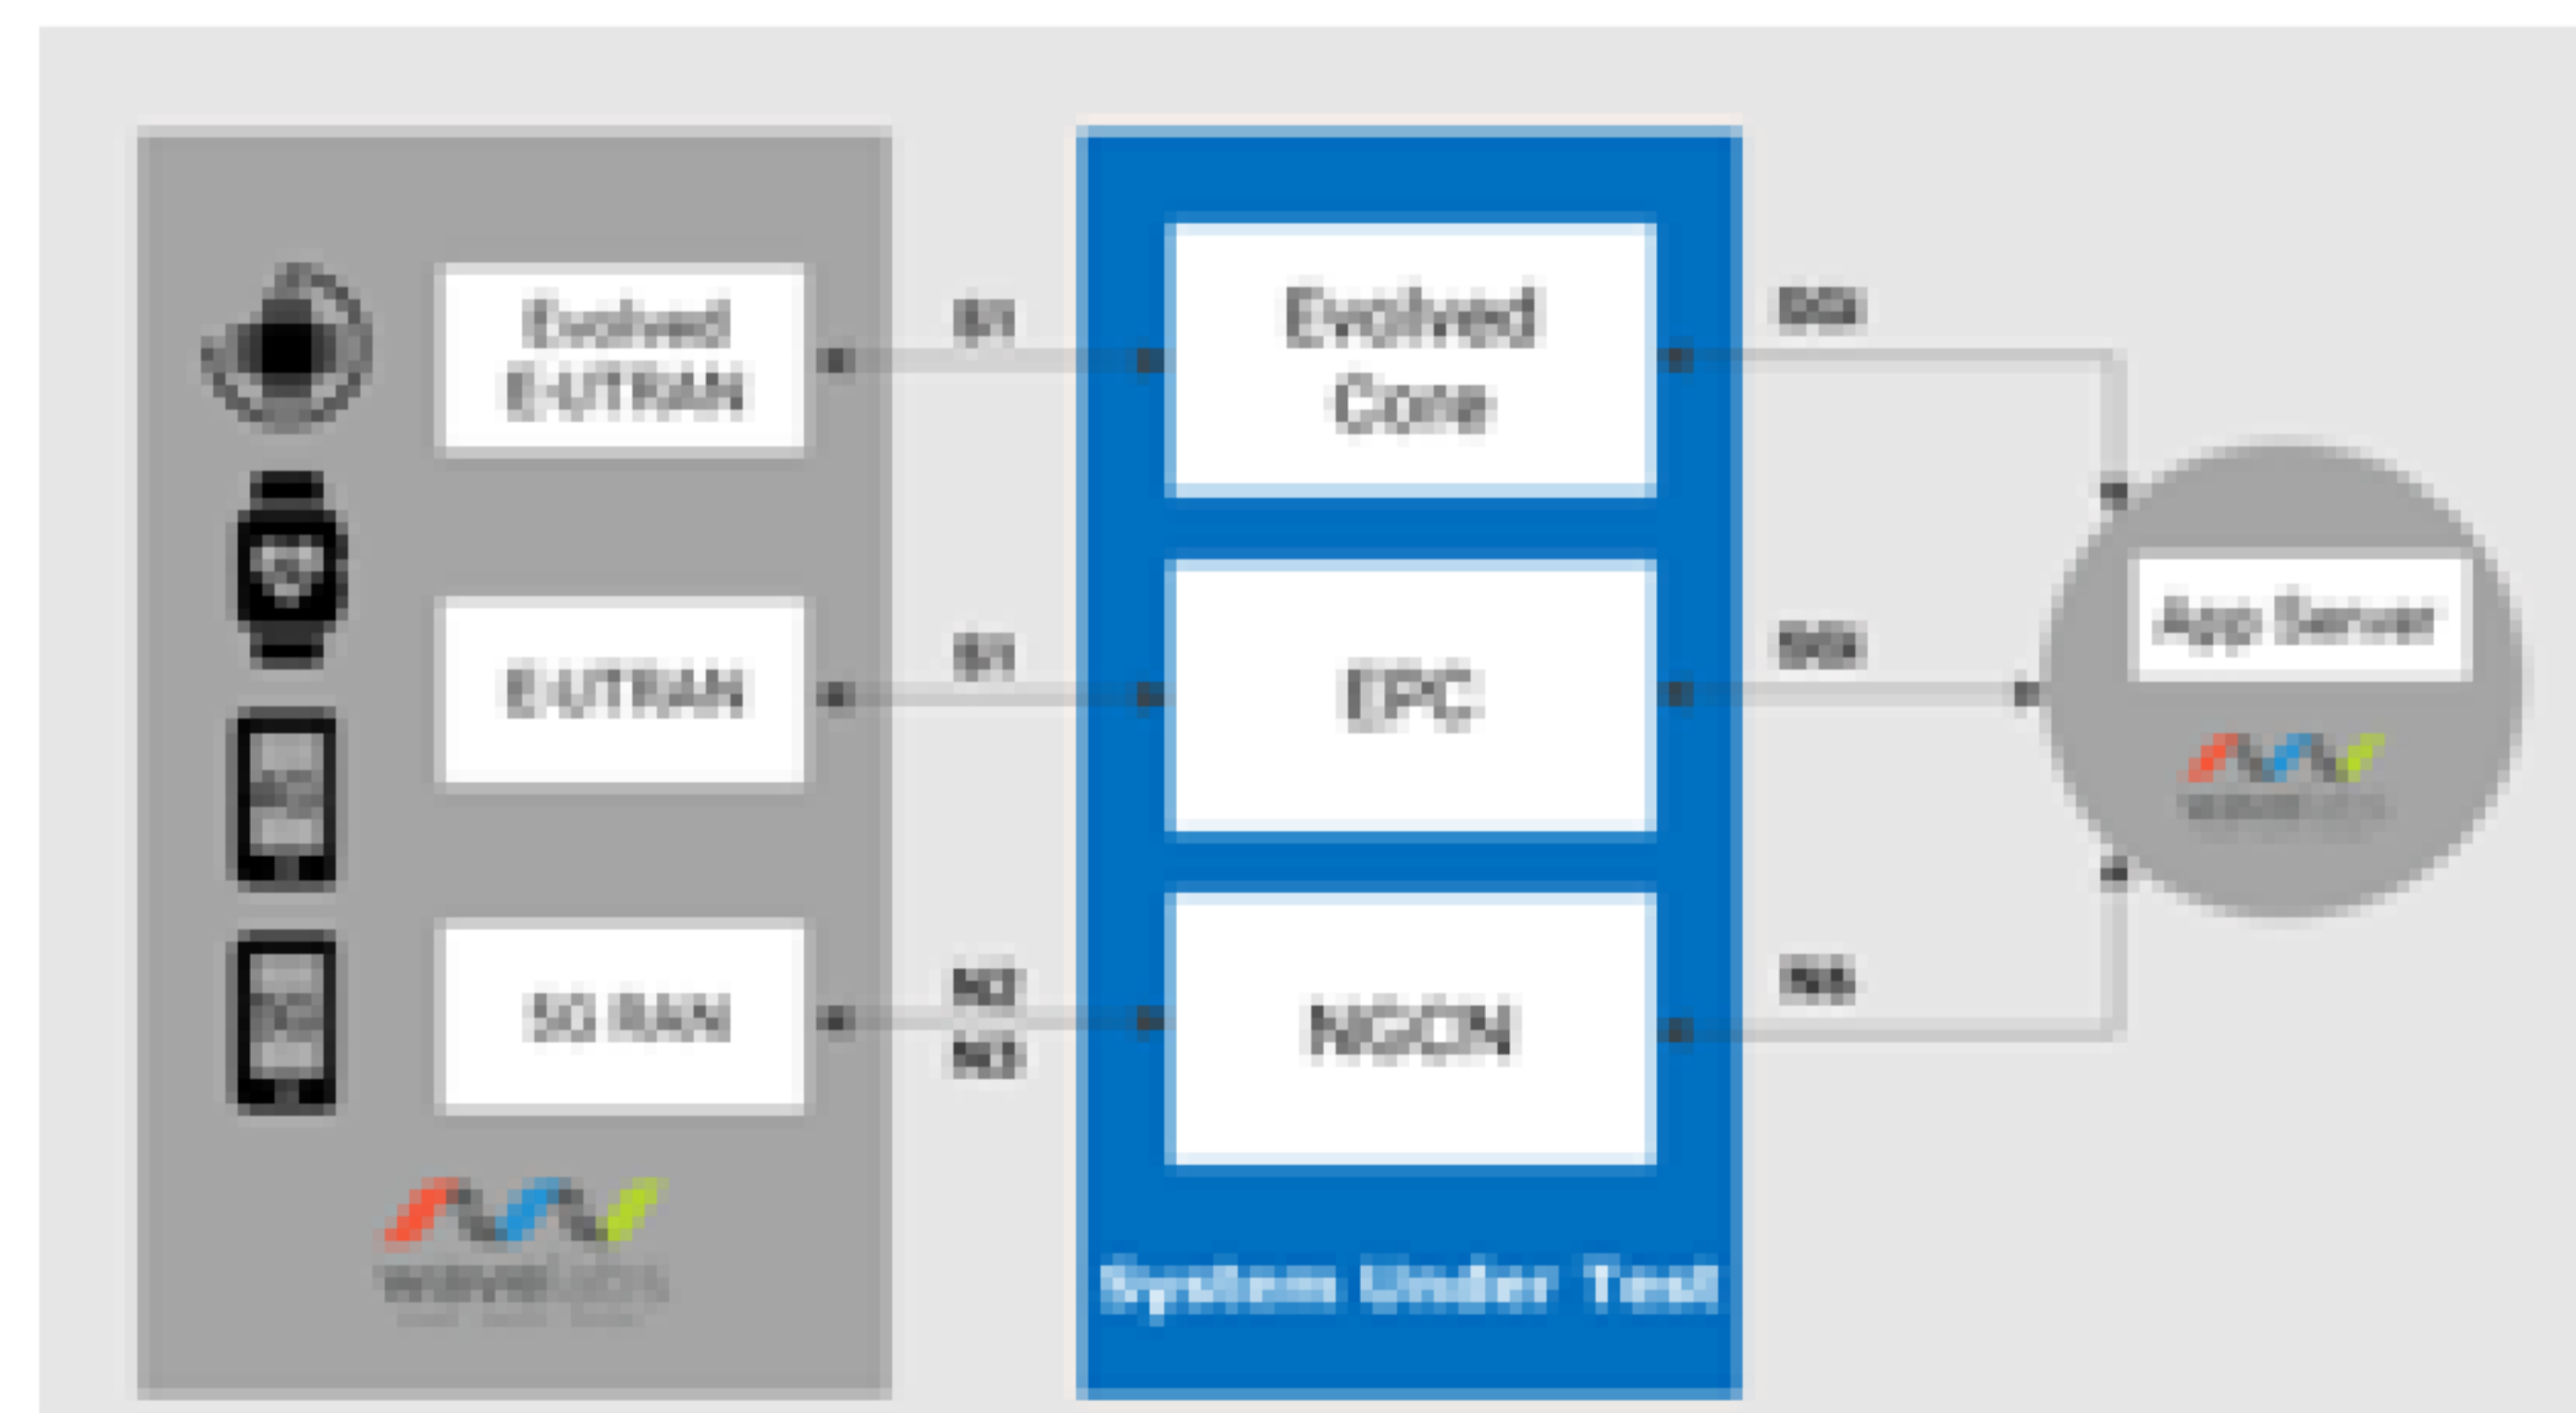

SOLUTION:

Emulated UE, eNB/gNB and Data Network to identify and debug the interoperability issues as per 3GPP specification procedures with the assistance of ABot AI and RCA reports

OUTCOME:

Successful integration and validation of function and load capabilities of Polaris NetEPC 4G Network including automation using Test orchestration and CICD pipeline

E2E Network Interoperability

Lab Network Testing
